BLANK PAGE

EXPLANATION OF STATISTICS

Security restrictions: Commodity groupings which include Special Category shipments, if any, are identified with an asterisk (*). For the asterisked commodities, vessel and air totals do no include Special Category shipments although such shipments are included in the "all methods" totals.

Estimated Shipments and Shipments Valued $10,000 and Under: Effective January, 1985, export statistics are fully compiled on shipments valued over $1,000 to all countries. Value data for shipments valued under $1.001 are estimated for individual countries using factors based on the ratios of low-valued shipments to individual country totals. Estimated data for shipments value under $1,001 are included only in the Schedule E section 9 (division 99, group 990 and subgroup 990.0) totals shown in export reports.

Effective January 1984 statistics, data for merchandise valued $10,000 and under which were not reported with a valid export commodity classification are included only in Schedule E section 9 (division 99, group 990 and subgroup 990.0) totals.

Foreign Trade Zone (FTZ) Data: Beginning with the processing of the July 1982 statistics, the export coverage was expanded to include data on the movement of merchandise out of U.S. Foreign Trade Zones

Other: For detailed information on coverage, valuation, nonmonetary gold shipments, estimating procedures, sources of error in the data, security restrictions,and related matters, see the "Explanation of Statistics" section of Report FT410 and/or the "Guide to Foreign Statistics."

Symbols: X—Not applicable. Z—Less than half of the unit of measurement shown.
